The process to connect synergic training offers

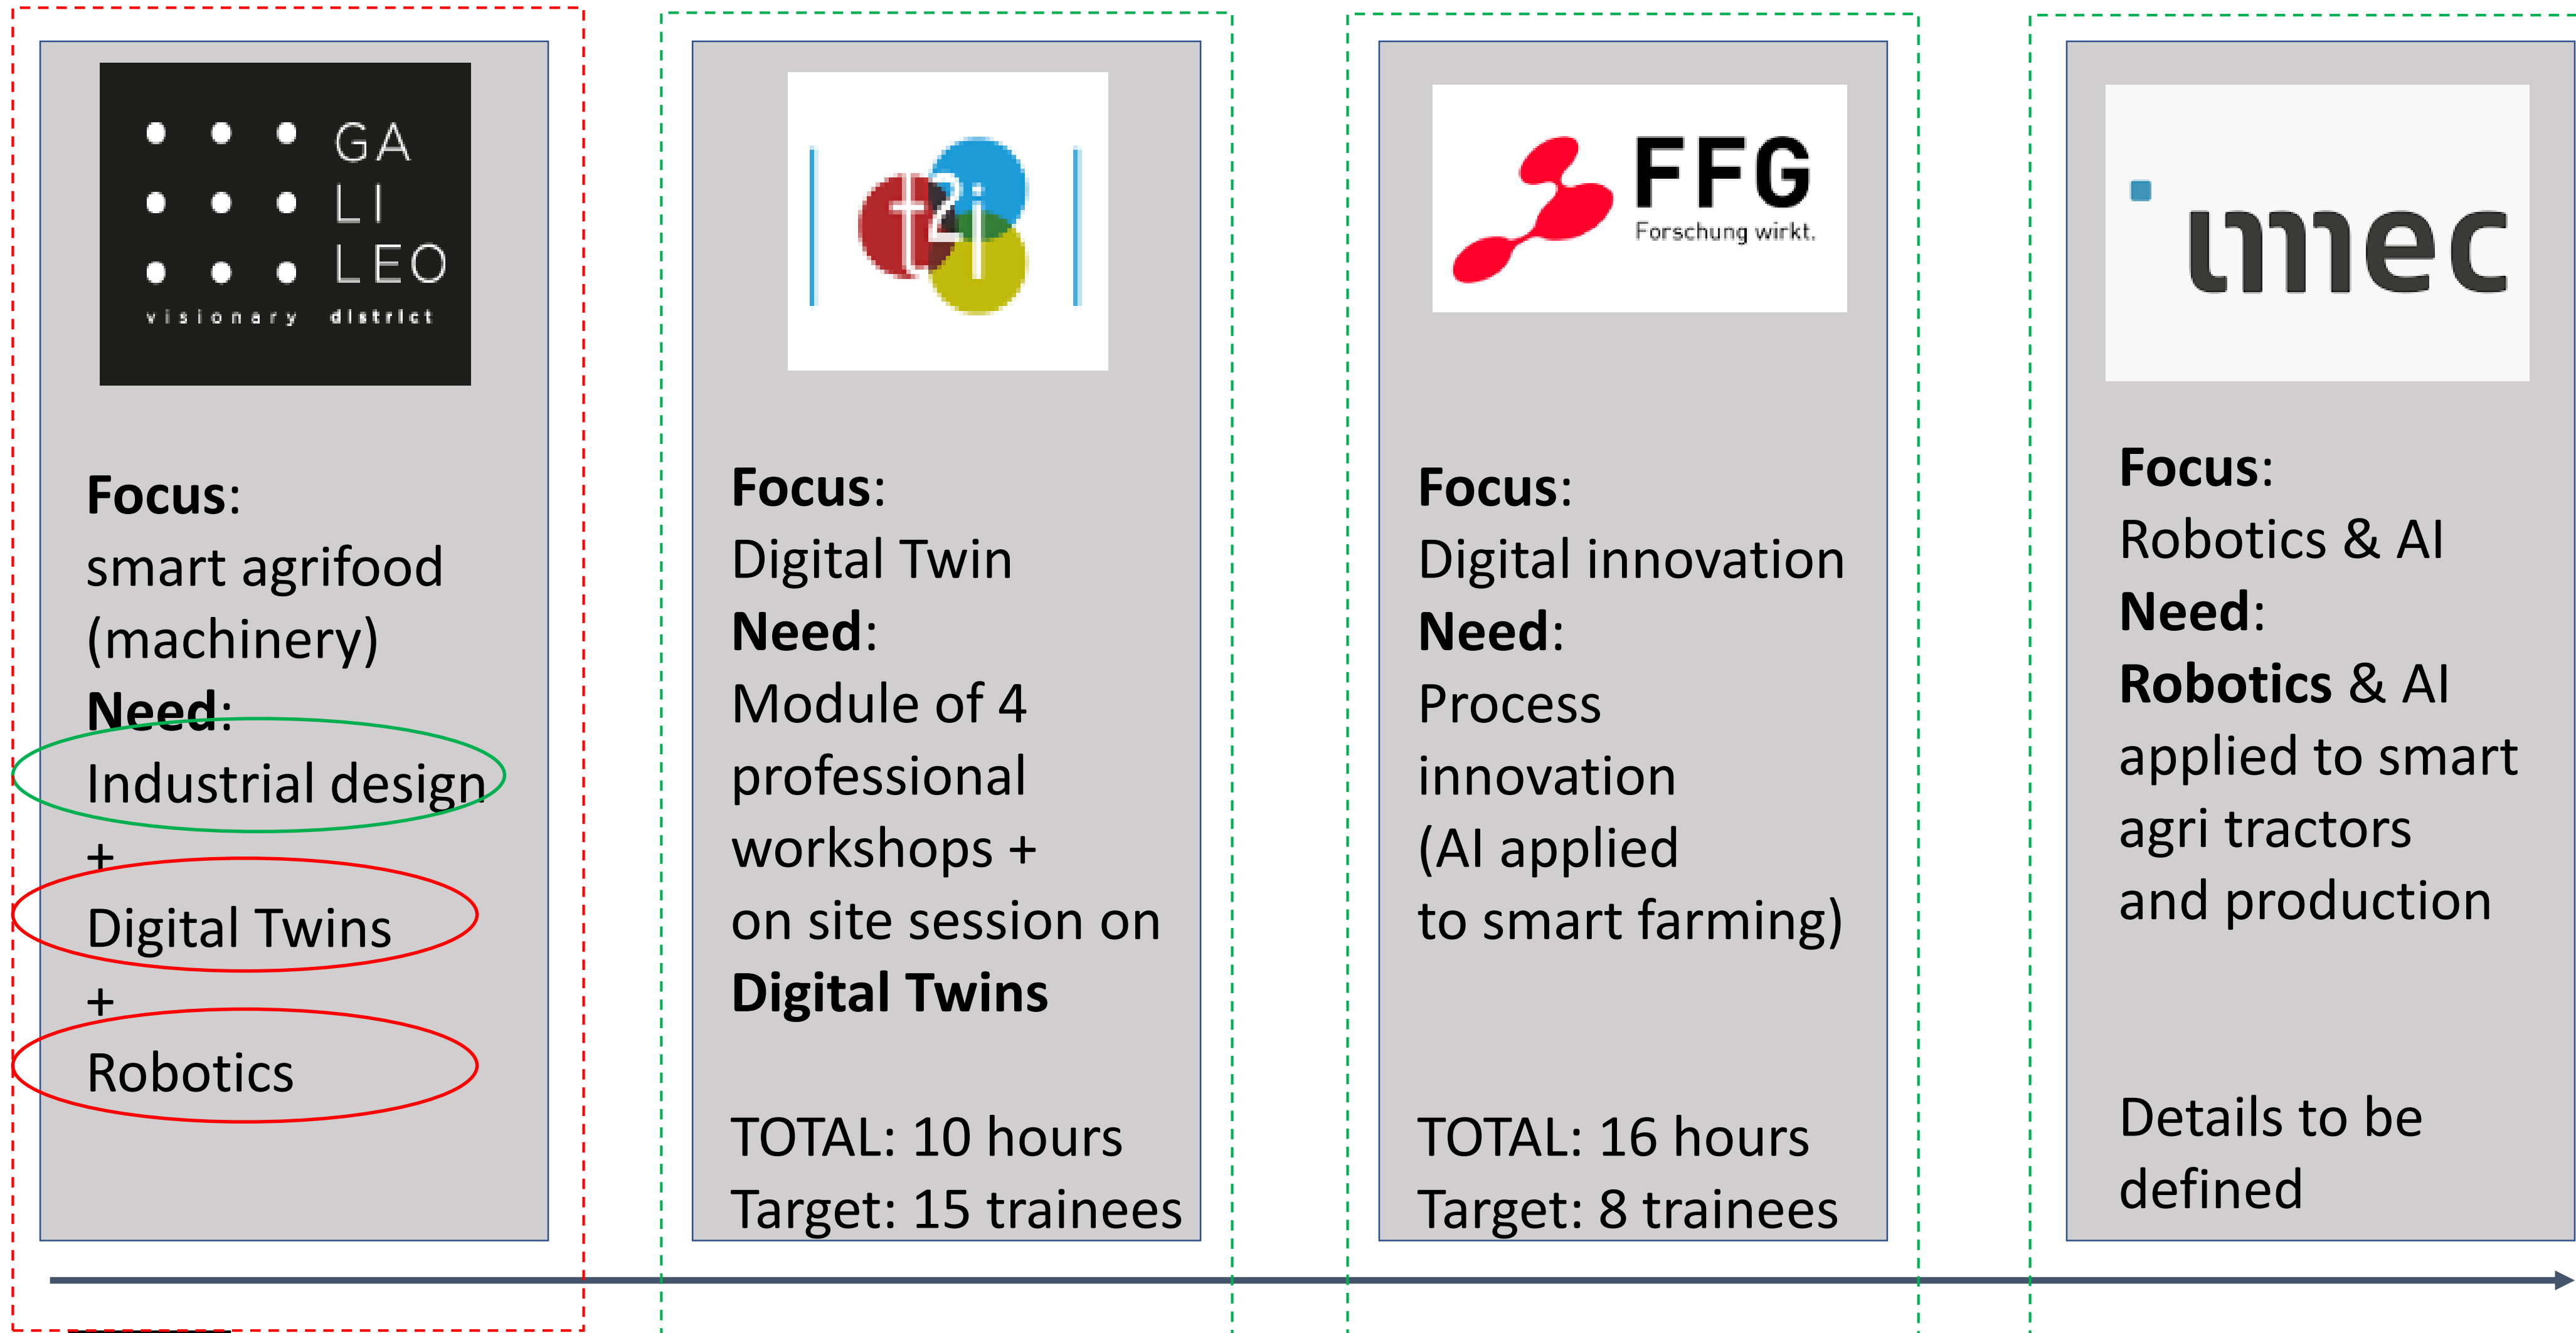

Tips for an Action Plan

How to define & consolidate an effective training cooperation network

- 1) Make it **relevant** (a need / customer + a combined offer)
- 2) Make it «**simple**» (language and accessibility)
- 3) Ensure clients understand **what they get** (target + quality + mutual recognition of learning outcomes)
- 4) Take some time to **test** (content + methods + trainers)
- 5) Make it **permanent** with relevant «upgrades» and certain level of flexibility
- 6) Where relevant, embed it into **wider initiatives** (IAs, thematic networks, etc.)

Connecting DIHs + Tos: from local to EU
