

FUTURE OF FSTP

- Summer Camp

- 11th June 2020

SESSION OVERVIEW

12.00-
12.40

The future of FSTP

Introduction to the session (5m)

Geoff

Brainstorming moderated in GroupMap (15m)

All

Discussion on results (20m)

Geoff

PURPOSE

- The objective of this session is to initiate the Working group on the Future of the FSTP instrument of the Commission. This Working Group will advise the Commission on changes in their FSTP approach to improve the efficiency and the effectiveness.
- The outcomes of the previous session will be taken as a starting point, but also additional issues will be discussed. These additional issues can be about:
- Improved collaboration between the IAs to ensure efficiency of their activities (e.g. common outreach, shared evaluator), as well as development of a general standardized approach with accompanying manuals, materials;
- Standardized collection of information for evaluation, communication and misuse of the instrument (e.g. double funding);
- Changes in approach with regard to funding SMEs to improve impact of the instrument.

APPROACH

- The approach to this session is a brainstorm, facilitated by an internet based brainstorming tool ([Groupmap](#)). Several issues will be presented and the participants are asked to comment on them. The moderator will structure the information. After the brainstorm, the moderator will initiate the discussions and draw conclusions.
- Potential areas to consider:
 - Administration
 - Target groups
 - Timescales
 - Things to improve commercial uptake of actions
